Immediately downstream from the proposed point of diversion.

Complete property shown, view south westerly, with Pine Gulch Creek in gray topped trees at bottom of steep wooded hillside. POD located behind buildings to right of yellow "Indian Mound" field. 5.5 ac-ft Pond 2 to be installed in fallow field between road and brush. POU in farmed fields and in pasture above driveway.

Immediately upstream from the proposed point of diversion.

Peter Martinelli and Dennis Dierks in Pine Gulch Creek, Spring 2008 in photo from San Francisco Focus Magazine, July 2008. Site is about ½ mile downstream of actual POD, but is typical of the riparian corridor. Banks are steeper and pools larger farther upstream. See www.sanfrancmag.com/story/swimming-uphill-for-salmon#story_top. View upstream. No new construction required at existing POD.

At the place(s) where the water is to be used.

View south. Reservoir site in fallow field at center left. POU in bottomland to right of driveway. POU to right of farmstead buildings below yellow field. Mature alders, willows, riparian shrubs in Pine Gulch Creek. Existing infrastructure for POD will be used.
